

Dominik Sieroń

Software Developer

I am a student of Computer Science in Engineering at the AGH University of Science and Technology in Krakow and I am taking my first steps in the IT industry. As a young person who is passionate about their work, I am certain that I will bring a lot of new energy to your team. I am very meticulous and able to work both independently and as part of a team

Work History

- 2023-10
- present

Web Developer

AGH Code Industry, Kraków

- Working on clubs website using Nextjs, SASS and TypeScript.

Education

- 2022-10
- present

Computer Science in Engineering, Engineering studies - in progress

AGH University of Science and Technology, Kraków

Projects

- 2023-05
- present

Web Developer

Car rental website

carrental.dsieron.pl

Harnessing the advanced capabilities of Next.js, I developed and deployed a cutting-edge full-stack web application named 'Car Rental'. This dynamic application is designed to offer a smooth and efficient car rental experience, allowing users to browse, reserve, and rent vehicles with just a few clicks. Leveraging Next.js, it employs server-side rendering and static site generation to deliver superior performance and SEO advantages. Key features of this application include an interactive car catalog, a dynamic search filter for precise vehicle selection, and a streamlined reservation process. Through integrating Next.js' newest features, the application ensures an engaging and responsive user interface along with robust back-end functionalities.

Frontend Developer

mytriproutes

mytriproutes.com

As part of a small team of three, I was responsible for frontend development and design in the mytriproutes project. I utilized various tools and technologies, including React, Typescript, and SCSS, and later migrated the project to Tailwindcss.

Our team had specific technical goals in mind throughout the project, with a focus on providing users with an intuitive interface and ensuring high website performance.

Overall, MyTripRoutes benefits users by making it easier for them to plan and share their trips, and store their photos and routes in a user-friendly way. A preview of the project is available at the link above.

Languages

- English - C1
- Polish - C2

Hobby/Interest

I love playing the piano and trumpet. These hobbies require patience and creativity, and I really enjoy the challenge. Traveling is another passion of mine. It's a great way to learn about different cultures and it has given me a more rounded view of the world. I'm also interested in cars and enjoy learning about their in-depth features. On top of these, I'm a big fan of @t3dotgg. All these hobbies have helped improve my communication and teamwork skills and they play a big role in my personal and professional growth.
