Dominik Sieroń

Software Developer

I am a student of Computer Science in Engineering at the AGH University of Science and Technology in Krakow and I am taking my first steps in the IT industry. As a young person who is passionate about their work, I am certain that I will bring a lot of new energy to your team. I am very meticulous and able to work both independently and as part of a team

Projects

2023-05 - present

Web Developer

Car rental website

car-rental-dominiksieron.vercel.app

Harnessing the advanced capabilities of Next.js, I developed and deployed a cutting-edge full-stack web application named 'Car Rental'. This dynamic application is designed to offer a smooth and efficient car rental experience, allowing users to browse, reserve, and rent vehicles with just a few clicks. Leveraging Next.js, it employs server-side rendering and static site generation to deliver superior performance and SEO advantages.
Key features of this application include an interactive car catalog, a dynamic search filter for precise vehicle selection, and a streamlined reservation process. Through integrating Next.js' newest features, the application ensures an engaging and responsive user interface along with robust back-end functionalities.

Frontend Developer

mytriproutes

https://mytriproutes.com

As part of a small team of three, I was responsible for frontend development and design in the mytriproutes project. I utilized various tools and technologies, including React, Typescript, and SCSS, and later migrated the project to Tailwindcss.
Our team had specific business and technical goals in mind throughout the project, with a focus on providing users with an intuitive interface and ensuring high website performance.
We successfully created an intuitive user interface, and the website functions quickly and smoothly. Overall, MyTripRoutes benefits users by making it easier for them to plan and share their trips, and store their photos and routes in a user-friendly way. A preview of the project is available at the link above.

Hobby/Interest

I am passionate about playing piano and trumpet, skills that require patience and creativity. I also enjoy traveling and exploring different cultures, which has helped me develop a well-rounded perspective. Additionally, I have a keen interest in cars. These hobbies have enhanced my communication and teamwork skills and have been an integral part of my personal and professional growth.
